

**Tomorrow is the Last Chance for Discounted Registration
Stop Procrastinating and Register!**

The **discounted registration** closes tomorrow at midnight, and the only way to register will be thru onsite registration on February 17th.

During this two day event, you can earn up to 8 PDHs, learn about the latest developments in water resources and waste cleanup, plus FDEP and Water Management Districts management will be in attendance so this will be a good opportunity to engage with them.

[Network with Government and Consultants - Registrants as of 2/09/2016](#)

Additionally, much has been happening in the waste cleanup arena and the courses focus on areas where FDEP's policy is fast evolving or where legislation is underway such as Risk Based Corrective Action, background definition, monitored natural attenuation, etc.

If you have any questions, please feel free to reach out to shobbs@fleng.org.

Earn up to 8 PDHs!

FAPG Florida Association of Professional Geologists

Florida Engineering Society

present the
2nd Annual Winter Water Seminar
 February 17-18, 2016
 Four Points by Sheraton
 Downtown Tallahassee

Who Needs to Attend
 Public and Private sector Professional Engineers, Geologists, Scientists and Consultants whose practice areas involve water resources. This advanced seminar is primarily designed for technical staff within and outside of government.

How Will I Benefit?
To Register or For More Information:
fleng.org/seminars.cfm?event_id=718

Government staff:

- Technical series of courses benefits cross-training initiative within FDEP, water management districts, and other agencies
- Promotes statewide consistency in interpretation and implementation of rules
- Provides access to statewide subject matter experts at a single location and low cost
- Application quality improves when private sector consultants are trained in same material

Private sector technical staff:

- Provides continuing education credits to meet licensing renewal requirements
- Meets demand for latest information from regulatory agencies
- Networking opportunities with those who process their applications and conduct inspections at their facilities
- Consultants and regulators training simultaneously results in faster permit decisions and better inspection outcomes

What Topics Will Be Covered

- NPDES Permitting Fundamentals: The ABCs of CGPs, MSGPs, NEXs, NOIs, NOTs and MS4s
- Stormwater Treatment Design in the era of TMDLs, BMAPs and NNC
- Emerging Water Supply Issues: Water Harvesting, ASR, Reuse, etc
- Regulatory Updates: CFWI, NFRWSP, Reuse Study, Water Quality Credit Trading Rule, etc
- Groundwater Remediation: Monitored Natural Attenuation Evaluation or "When to switch back to active remediation?"
- Operation and Maintenance of Groundwater Remedial Systems: Establish Point of Diminishing Results
- Program updates: Contaminated Media Forum, Rules 62-780 and 62-777, Institutional Controls Guidance, and legislation
